

Close Protection

Personal and close protection, invisibly delivered.

Elite personal and close protection across every tier — from corporate details through UHNW, celebrity, and high-risk international mandates. Our operators view themselves as security advisors first, assessing and proactively managing risk to both principal and mission, and holding a low profile throughout to deliver a silent yet impenetrable barrier of safety.

THE MANDATE INCLUDES

- Corporate and specialist close protection officers
- UHNW, family, and celebrity details
- High-risk and international mandates
- Lifestyle-calibrated, low-profile operators
- Proactive risk management and advance liaison
- Seamless integration with existing security teams

CAPABILITIES

CORPORATE & SPECIALIST CPO

UHNW & CELEBRITY

HIGH-RISK INTERNATIONAL

SECURITY-ADVISOR POSTURE

OUR APPROACH

Every detail is grounded in intelligence and calibrated to the principal's world, so protection reads as normality — present, unbroken, and never perceptible.

Part of the Greyveil footprint. Residential & office security, secure transport, travel risk management, threat assessment, and TSCM — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Residential & Office Security

Discreet protection for the places that matter most.

Discreet manned and static protection for private estates, family residences, and offices — from concierge-grade presence through high-risk luxury-asset guarding. We secure premises as living, working environments: layered measures that protect people and property without turning a home into a fortress or an office into a checkpoint.

THE MANDATE INCLUDES

- Private estate and residence security
- Office and static / manned guarding
- Concierge-grade reception and presence
- High-risk luxury-asset protection
- Access control and controlled perimeters
- Household and staff integration

CAPABILITIES

ESTATE & RESIDENCE

OFFICE & STATIC GUARDING

CONCIERGE-GRADE

LUXURY-ASSET PROTECTION

OUR APPROACH

Security designed around how the household and business actually operate — protective, unobtrusive, and calibrated to the setting rather than imposed upon it.

Part of the Greyveil footprint. Close protection, secure transport, travel risk management, threat assessment, and TSCM — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Secure Transport

Protected movement, from door to door.

Protected transit by security-trained chauffeurs and, where the threat requires, armoured vehicles. Routes are reconnoitred and vetted in advance, movement is tracked and supported throughout, and contingency is built into every leg — so the principal travels through ground that is already known and controlled.

THE MANDATE INCLUDES

- Security-trained, CP-licensed chauffeurs
- Armoured / secure vehicles where required
- Advance route reconnaissance and vetting
- Live movement tracking and support
- Contingency and counter-surveillance driving
- Coordination with the principal's team

CAPABILITIES

SECURITY-TRAINED DRIVERS

ARMOURED TRANSPORT

ROUTE RECONNAISSANCE

MOVEMENT TRACKING

OUR APPROACH

Every journey is planned as an operation — quietly, in advance — so the principal experiences nothing but a smooth, unremarkable drive.

Part of the Greyveil footprint. Close protection, residential & office security, travel risk management, threat assessment, and TSCM — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Travel Risk Management

The world, secured before you arrive.

Command of every detail of global movement. Pre-travel risk assessment, itinerary and route mapping, venue and hotel advance, and on-ground lead coordination — each environment screened, receiving parties confirmed, and local conditions assessed before the principal's arrival, and supported by real-time intelligence throughout.

THE MANDATE INCLUDES

- Pre-travel risk assessment and briefing
- Itinerary and route mapping
- Venue and hotel advance work
- On-ground lead coordination and liaison
- Real-time intelligence and monitoring
- Contingency and evacuation planning

CAPABILITIES

PRE-TRAVEL RISK ASSESSMENT

ADVANCE & VENUE SCREENING

ITINERARY PLANNING

ON-GROUND LEAD

OUR APPROACH

Delivered as a scoped programme rather than presence alone — complex international travel reduced to a series of controlled, unremarkable moments.

Part of the Greyveil footprint. Close protection, residential & office security, secure transport, threat assessment, and TSCM — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Threat & Risk Assessment

The intelligence beneath every mandate.

The foundation beneath every mandate. Intelligence-led assessment across physical, digital, travel, and staff-risk domains — geopolitical and cultural analysis, forensic threat modelling, and multilingual open-source and human-source insight — translated into clear, actionable guidance for the principal and their advisers.

THE MANDATE INCLUDES

- Threat & risk assessment: residence, office, individual
- UHNW comprehensive multi-domain assessment
- Geopolitical and cultural analysis
- Forensic threat modelling and forecasting
- Multilingual open-source and human-source insight
- Written assessment with clear recommendations

CAPABILITIES

TRA & SITE ASSESSMENT

GEOPOLITICAL & CULTURAL ANALYSIS

FORENSIC THREAT MODELLING

ACTIONABLE REPORTING

OUR APPROACH

Not a product line but the discipline that makes everything else possible — anticipation, delivered as expertise rather than headcount.

Part of the Greyveil footprint. Close protection, residential & office security, secure transport, travel risk management, and TSCM — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Technical Countermeasures

Privacy, technically assured.

Electronic counter-surveillance protecting the principal's privacy where it is most exposed. Discreet technical sweeps of residences, offices and boardrooms, and vehicles detect and neutralise eavesdropping and tracking threats — with elevated-threat sweeps and pre-engagement scoping where a specific risk has been identified.

THE MANDATE INCLUDES

- Residential sweeps, apartment to estate
- Office and boardroom sweeps
- Vehicle sweeps
- Elevated-threat status response
- Pre-sweep scoping and risk consultation
- Discreet, non-disruptive on-site work

CAPABILITIES

RESIDENTIAL SWEEPS

OFFICE & BOARDROOM SWEEPS

VEHICLE SWEEPS

ELEVATED-THREAT RESPONSE

OUR APPROACH

Conducted discreetly and without disruption, so the environment is cleared and the principal's confidentiality quietly restored.

Part of the Greyveil footprint. Close protection, residential & office security, secure transport, travel risk management, and threat assessment — six protective disciplines that compound into one intelligence-led relationship around a single principal.

Superyacht Security

The whole footprint, afloat.

Discreet protection for principals and their guests at sea. Greyveil extends its intelligence-led standard to the maritime environment — securing the vessel, its movements, its ports of call, and every excursion ashore. Delivered through an elite network of maritime specialists and coordinated under one relationship, protection is woven into the rhythm of the yacht: present, compliant, and never off-watch.

THE MANDATE INCLUDES

- Onboard protective teams, integrated with crew — armed or unarmed per environment and law
- Close protection for principal, family, and guests, afloat and ashore
- Advance reconnaissance, tender and shore-excursion security
- Ship Security Officer provision and vessel security planning (ISPS / ISM / SOLAS)
- Transit security through high-risk waters — counter-piracy and boarding
- Voyage, port, and marina risk assessment with maritime intelligence
- Crew security-awareness training and crisis-management drills
- Technical countermeasures (TSCM) and maritime cyber-risk management

CAPABILITIES

ONBOARD PROTECTION

SHORE & TENDER

SSO & ISPS

HRA TRANSIT

MARITIME INTELLIGENCE

TSCM & CYBER

OUR APPROACH

Calibrated to life aboard and aligned with the captain and crew, so the principal experiences only the freedom of being at sea — while the vessel, the voyage, and every landfall are quietly secured.

The Greyveil footprint, afloat. Close protection, residential security, secure transport, travel risk, threat assessment, and TSCM — each extended to the maritime environment and delivered under one intelligence-led relationship.

Echelon Black

Bespoke protective operations for the most complex environments.

Echelon Black is Greyveil's tactical special-projects capability — bespoke protective operations within complex, elevated-risk, and hostile environments. It conducts specialist deployments spanning secure movement, operational support, and strategic protective capability, executed with discretion, adaptability, and mission-focused professionalism.

THE CAPABILITY INCLUDES

- Bespoke protective operations, scoped to the mandate
- Elevated-risk and hostile-environment deployments
- Secure movement and extraction support
- Operational planning and on-ground support
- Strategic protective capability and advisory
- Discreet, mission-focused execution

CAPABILITIES

HOSTILE-ENVIRONMENT OPS

SECURE MOVEMENT

OPERATIONAL SUPPORT

STRATEGIC CAPABILITY

OUR APPROACH

Engaged discreetly, by referral, for mandates that fall outside the standard catalogue — planned in depth and executed with adaptability where the environment is most demanding.

Greyveil's tactical arm. Echelon Black operates apart from the standard service catalogue — engaged for bespoke, elevated-risk mandates worldwide, under absolute discretion and senior command.
